

NO CONSTRUCTION SHALL START PRIOR TO ACQUIRING YOUR PERMITS!!

In order to speed up the approval process, please ensure you have done the following:

1. Meet the Zoning Requirements of the Municipality
 - Determine the zoning in the area that you intend to build. A building permit will not be issued unless a Development Permit has been issued by the municipality.
 - Ensure you comply with the zoning requirements, including setback requirements.
 - Complete the Application for Development Permit and submit to the RM of Big River No. 555 along with the Development Permit Fee (Permitted Use \$50.00, Discretionary Use \$200.00).
2. Complete and Submit the Application for Building Permit
 - Complete the Application for Building Permit.
 - Submit the completed application form along with 1 complete set of plans to the RM office.
 - The application will be forwarded to BuildTECH Consulting & Inspections Inc., the municipality's building inspector, for approval.
 - When the municipality receives approval and confirmation of completed building value from the building official, you will be invoiced for the costs. Permits will be issued when payment is received.

If you have any questions please call our office at (306) 469-2323 or email us at rm555@rmofbigriver.ca.

Section 7 (1) Uniform Building and Accessibility Standards Act(...the owner of each building in Saskatchewan shall ensure that the building is designed, constructed, erected, placed, altered, repaired, renovated, demolished, relocated, removed, used or occupied in accordance with the building standards.”

If you have any questions related to building standards, please call BuildTECH Consulting at (306) 370-2824 or email to inspection@btinspections.ca.

NOTE: No accessory building (garage or shed, etc) may be built prior to the dwelling being built.

Instructions on completing Building & Development Application Package:

- Must be completed and submitted to the RM, along with a site plan and Development Permit Application Fee of \$50.00 for a permitted use or \$200.00 for a discretionary use.
- Section 5 of the Development Permit Application should be left blank and will be completed from maps at the RM office when the permit is submitted.
- Site plan must be completed with all set backs clearly marked from building to all 4 property lines, north direction, all accessory buildings and drainage direction.

Application for Building Permit

- Must be completed and submitted to the RM, along with all required drawings, information and forms included with the Permit Application Checklist from BuildTECH Consulting & Inspections Inc.

Permit Application Checklist – BuildTECH

- BuildTECH supplies these forms that must be completed before the permit will be approved. Once approved by BuildTECH the invoice will be emailed.
- To speed up the approval process ensure all forms are completed before returning.

Application for a Permit to Demolish or Move a Building

- Must be completed and submitted to the RM for any building to be moved into or out of the municipality. There is no charge for a moving permit. The RM must be informed when the moving of the building is complete.
- Must be completed and submitted to the RM for any building to be demolished within the municipality, along with the Demolition Permit Fee of \$50.00. The RM must be informed when the demolition is complete. RM will inform SAMA of the removal of building so they property can be re assessed.

Rural Plumbing/Sewage Disposal Permit Application - Submit to Regional Health Authority

- Must be completed and submitted to Regional Health Authority - Health Inspection office to apply for a plumbing/sewage disposal permit. Please deposit a copy of your Valid Sewage Disposal Permit to the RM Office as soon as you receive it.
- *The RM must have a copy prior to any permits being issued.*

All documents must be submitted together and fully completed. If not the approval process will take much longer.

E-transfer: payments@rmofbigriver.ca
Cheque, cash or debit.

Rural Municipality of Big River No. 555

DEVELOPMENT PERMIT APPLICATION

Applicants are encouraged to check the regulations in the RM of Big River No. 555 Zoning Bylaw, 23-01-02 that governs the type of development proposed prior to completing the application. Fill out only those sections of the application which are relevant to your proposal. Attach additional sheets if necessary.

1 Applicant Information

Full Name _____
Address _____

Phone _____
Email _____

2 Registered Owner Information (if different from applicant)

Full Name _____
Address _____

Phone _____
Email _____

3 Property Information (include any applicable)

Subdivision _____ Lot _____ Block _____ Plan No. _____
Part _____ Section _____ Township _____ Range _____ W3rd
e.g. NE 27-56-07

4 Proposed Development Information

a) Existing use of land and/or buildings: _____

EXISTING SIZE: _____

b) Proposed use of land and/or buildings: _____

PROPOSED SIZE: _____

c) Proposed construction and alteration of buildings: _____

d) List any adjacent or nearby land uses: _____

e) Any additional information which may be relevant: _____

f) Proposed date of start: _____ g) Proposed date of completion: _____

5 Potential Development Constraints

RM OFFICE USE ONLY

FOR RM USE ONLY: Consult the RM of Big River No. 555 Official Community Plan Bylaw, No. 1/16, Maps 1 through 5 and indicate with ☐ whether the proposed development site is located **within** any of the following areas:

Map 1 – Preferred Transportation Corridors

Preferred transportation corridor ☐

Map 2 – Soil Capability for Agriculture

High capability (green) ☐

Moderate capability (yellow) ☐

Low capability (red) ☐

Organic (brown) ☐

Map 3 – Separation Distances Required by a Potential ILO (FOR ILO APPLICATIONS ONLY)

No ILOs Permitted ☐

ILOs up to 499 Animal Units ☐

ILOs up to 2,000 Animal Units ☐

ILOs > 2,000 Animal Units ☐

Map 4 – Development Constraints

Terrestrial wildlife habitat ☐

Wetland ☐

1 km rural-urban fringe ☐

Future urban growth area ☐

457 m lagoon setback ☐

First Nations reserve ☐

Provincial parks & recreation sites ☐

Resort / country residential subdivision ☐

Recreation development ☐

Map 5 – Digital Elevation Model

Approx. elevation between 462–554 (blue–cyan) ☐

Approx. elevation between 554–645 (yellow–red) ☐

6 Site Plan / Vicinity Map

On the last page of this development permit application, show a Site Plan / Vicinity Map of the proposed development that shows:

- a) dimensions of the site
- b) location and size of all existing and proposed buildings and structures
- c) utility lines, easements, or topographic features
- d) proposed location of sewage system and water supply
- e) access points to provincial highway or municipal road
- f) **FOR ILOs ONLY:** the location, distance, and direction to neighbouring sites/dwellings

7 Application Fees

As per the RM of Big River Zoning Bylaw No. 1/19, the applicable fees for a development permit are as follows:

- a) Development Permit: \$50.00
- b) Building Permit BuildTECH: Determined by sq. ft./Inspection
- c) Building Permit RM Office: Determined by sq. ft./Office Fee
- d) Discretionary Permit: \$200.00

These fees are in addition to any fees relating to a zoning amendment. **Please contact the RM office for the amount to submit.**

8 Declaration of Applicant

I, _____ of the _____ in the Province of _____ solemnly declare that the above statements contained within this application are true, and I make this solemn declaration conscientiously believing it to be true, and knowing that it is of the same force and effect as if made under oath, and by virtue of the Canada Evidence Act. I have no objection to the entry upon the land described herein by the person(s) authorized by the Rural Municipality of Big River No. 555 for the purpose of site inspections required for reviewing this application.

I understand the information provided in this application will be shared with Saskatchewan Assessment Management Agency (SAMA).

Building Permit Application

I hereby make application for a permit to _____ Construct
_____ Alter
_____ Reconstruct

A building according to the information below and to the plans and documents attached to this application.

Legal land description:

Subdivision _____ Lot _____ Block _____ Plan No. _____

Part _____ Section _____ Township _____ Range _____ W3rd
e.g. NE 27-56-07

Owner _____	Email _____	Telephone _____
Engineer _____	Email _____	Telephone _____
Contractor _____	Email _____	Telephone _____

Square footage of building _____

- Accessory buildings shall not be constructed or placed on any site prior to the construction of the principal building.
- Building permit must be completed and submitted to the RM, along with all required drawings, information and forms included. You will be invoiced for the building permit once the permit has been approved and prior to the issuing of the permits.
- I hereby acknowledge that I understand that permission to begin building is not granted to me until a Building Permit (Form B to Bylaw 17/19), signed by the Building Official or Administrator, and is returned to me.
- I hereby agree to comply with the Building Bylaw of the local authority and acknowledge that it is my responsibility to ensure compliance with the Building Bylaw of the local authority and with any other applicable bylaws, acts and regulations regardless of any plan review or inspections that may or may not be carried out by the local authority or its authorized representative.
- I hereby acknowledge that I have read this application and certify that the information contained herein is correct.

Permit Application Checklist – MOBILE HOME

Home Owner/Builders: The following information is required when submitting an application for a residential building permit and before a building permit is issued. The plan review will not begin until all required information is provided.

APPLYING FOR A BUILDING PERMIT DOES NOT EQUATE TO PERMISSION TO START CONSTRUCTION – BUILDING PERMITS WILL BE ISSUED BY THE MUNICIPALITY ONCE ALL ZONING AND BUILDING APPROVALS ARE COMPLETE.

Please read BT Bulletin, “Manufactured Home Definitions” for additional information and clarification of how the National Building Code applies to this project.

NOTE: Mobile homes not constructed by a CSA Certified facility, and a CSA Label cannot be produced, the mobile home will likely not be permitted.

Required Information:

A complete set of mobile home plans are required to be submitted along with the **Building Permit Application** for review and record. The plans shall include:

- **BT Worksheet – Mobile Homes:**
 - Complete the BT Mobile Home Worksheet which identifies specific required information regarding the construction of the home and the foundation system details being proposed
- **Site Plan** with the following information:
 - Show size and location of proposed mobile home
 - Show size and location of existing buildings on property
 - Show lot dimensions and shape
 - Show distance between buildings and property lines
 - Show North direction arrow
- **Mobile Home Layout Drawings** with the following information:
 - Exterior and Interior wall locations / room sizes and overall dimensions
 - Window sizes, locations, and type
 - Door sizes, locations and swing direction
 - HVAC unit/system location
- **Mobile Home Site Preparation and Anchorage Details**
 - See the BT Mobile Home Worksheet and information provided from CSA Z240

When is an Engineer Required?

- Professionally designed sealed engineer drawings are required for the following conditions:
 - A foundation outside the scope of the CSA Z240 standard

Required On-Site Inspections: (inspection requirements may change depending on the project type and size)

- Final; house is placed on foundation system, ready for occupancy with all health and life-safety systems operating (if the foundation or portions of the foundation are to be covered prior to placement of the mobile home, then a separate foundation inspection is to be arranged).

Inspection Call-In Program:

- It is the owner's responsibility to contact BuildTECH to arrange for all mandatory inspections.
- Work shall not proceed to a point that would cover up any required inspection stages.
- Failure to notify BuildTECH with appropriate time frames could lead to measures to uncover work at the owner's expense.
- Contact BuildTECH at 306-370-2824 to arrange for inspections; please provide at minimum 72 hours' notice.

BT WORKSHEET - MOBILE HOMES, SITE PREPARATION, AND FOUNDATION

Information:

(Home info is typically found on the inside of a kitchen cabinet or elec

Year Built:

Manufacturer:

Serial No.:

CSA No.:

Building & Fire Code Consulting & Inspections

p: 306.370.2824

f: 306.978.3014

e: info@btinspections.ca

Box 1612 . Martensville, SK . S0K 2T0

www.buildtechinspections.ca**BuildTECH Bulletin – Piles & Grade Beam**

1. Foundations which include piles and grade beams that support any fully finished livable floor space or second storey must be designed in accordance with Part 4 of the National Building Code and sealed by a professional engineer licensed to practice in the Province of Saskatchewan.
2. Foundations which include piles and grade beams that support non-finished floor spaces including attached garages with no livable floor space in or above, attached covered decks, and three season rooms shall meet the minimum specifications described below.

Grade Beam Construction

Grade beams must be a minimum of 200mm by 600mm (8 inches by 24 inches) with 2 – 15M bars top and bottom. Thickened edge slabs are not acceptable as a grade beam without an Engineer's seal. An acceptable void form must be placed under all grade beams.

Stirrups

It is the builder's responsibility to assess the soil conditions to determine the need for stirrups.

Void Forms

Void forms must be placed under all grade beams including extensions under garage door openings.

Cutouts in grade beams

Cutouts in a grade beam cannot occur without adequate structural provisions across the opening. The builder is solely responsible for cutouts where the grade beam is not dropped accordingly. Cutouts shall not exceed 300mm or the grade beam must be dropped accordingly. Where cutouts occur it is the builder's responsibility to ensure the top and bottom bars extend across the openings with sufficient overlap. Piles placed under cutouts must extend a minimum of 4 meters deep. A minimum of 1-15M bar must extend from the top bars in the grade beam to the full depth of the piles. Where possible piles must be placed at the edge of all cutouts unless designed by an engineer.

Pile Construction

Pile sizing and spacing must be designed for the anticipated loads. The following forms a general guide that will be accepted without an engineer's seal where used in accordance with item 2. above.

1. Small loads from 1 – vehicle attached garages, covered decks and/or 3 season rooms
200mm by 2400mm @ 2400mm on center concrete piles may be used to support roof spans up to 4.8 meters or floor joists spans up to 2.4 meters. Piles that support floor joists and roof loads must comply with 3) below.
2. Moderate loads from 2 – vehicle attached garages, covered decks and/or 3 season rooms
250mm by 3000mm piles @ 2400mm on center may be used to support roof spans up to 9.8 meters or floor joists up to 4.9 meters.
3. Combination roof and floor loads – covered decks and/or 3 season rooms
250mm by 3000mm piles @ 2400mm on center may be used to support floor joists and roof spans up to 3 meters. The span may be increased up to spans noted in 2. above, by reducing the spacing of the piles and/or increasing the length of the piles proportionally.

All piles must be reinforced with a minimum of 1-15M bar full depth of the pile extending to the top bars of the grade beam.

Piles adjacent to a foundation wall

Piles must also be placed within 0.9 meters of a concrete foundation wall. This pile should be a minimum 4 meters deep when within 1 meter of a recent excavation. See below for piles in excavated area.

Piles within 1 meter of a service trench

All piles located within 1 meter of a service trench are required to be a minimum of 4 meters deep. It is the builder's responsibility to ensure compliance.

Piles placed in excavated area

Piles must be extended for the depth of the excavation plus the minimum depth required under "Pile Construction", above. This is the builder's responsibility to ensure compliance.

BuildTECH Bulletin – Manufactured Home Definitions

“Mobile Home” is a portable structure built on a metal chassis that:

- Is defined in the Canadian Standards Association (CSA) Z240 MH standards as a “mobile home”, a “multiple section mobile home”, or a “swing out and expandable room section mobile home”, and
- Bears a CSA seal attesting that the structure complies with the Z240 standards.
- Mobile home are also constructed with a deformation resistant frame which allows them to be placed on surface riding foundation such as wood cribbing.
- Some municipalities will not accept mobile unit builders than the mid 1990’s because of lower grade construction and safety standard (i.e. flammable interior wall boarding).

“Modular Home” is a factory built house that is designed and intended for use as a domestic residence and:

- Is constructed in climate controlled factories usually an assembly line by assembling manufactured three-dimensional modular units, each with four walls and a roof/ceiling, that are each at least one room or living area, and
- Bears a CSA seal attesting that the house complies with the A-277 standards
- Modular homes are designed to be placed on basements or crawlspaces that follow the prescriptive requirements of Part 9 of the National Building Code. Some Modular homes are designed with a deformation resistant frame which allows the house to rest on the same surface foundation a mobile home permits.

“Ready-to-Move”/RTM or “stick-built home” is a house that is fully assembled by the builder off site in a yard or facility that:

- Is a single structure designed for to be placed on basements or crawlspaces that follow the prescriptive requirements of Part 9 of the Nation Building Code, and
- Is entirely constructed away from the site on which it will be affixed to the permanent foundation.
- Some RTM builders are certified to produce CSA-277 compliant products but many utilize area building officials to inspect.
- RTM homes that are not constructed in a certified and audited CSA-277 facility are required to be inspected by a Saskatchewan Class 1 (or higher) Building Official at the framing stage, and prior to drywall stage with documented inspection reports available to the municipality prior to issuing a building permit.
- RTM homes not constructed in a CSA-277 facility, and that have not been inspected at required stages will not be permitted.

FORM C

I hereby make application for a permit to **MOVE A BUILDING** now situated on

City/Town _____

Subdivision _____ Lot _____ Block _____ Plan No. _____

Part _____ Section _____ Township _____ Range _____ W3rd

e.g. NE 27-56-07

to

Subdivision _____ Lot _____ Block _____ Plan No. _____

Part _____ Section _____ Township _____ Range _____ W3rd

e.g. NE 27-56-07

The building has the following dimensions: length _____ width _____ height _____

The building mover will be _____

and the date of the move will be _____, 20 _____.

The building will be moved over the following route: _____

The site work (filling, final grading, landscaping, etc.) which will be done after removal of the building includes ____

I hereby agree to comply with the Building Bylaw of the local authority and to be responsible and pay for any damage done to any property as a result of the moving of the said building, and to deposit such sum as may be required by Section 6(1) (a) of the Building Bylaw. I acknowledge that it is my responsibility to ensure compliance with any other applicable bylaws, acts and regulations, and to obtain all required permits and approvals prior to moving the building.

Sewage Contractors

RE Sewage Permit Application Changes

Public Health Inspectors in the Saskatchewan Health Authority (SHA) provides a variety of services related to sewage under *The Private Sewage Works Regulations*.

Each former regional health authority had unique applications that could only be used for that area. In order to improve the services of this program one permit application form will be used throughout the SHA this year. A copy of this form is attached.

In former Prince Albert Health Region, the submitted application will be processed by email and once the sewage work is completed and approved, the hardcopy the permit will be mailed. The fee for a sewage application permit will be **\$30**.

Effective immediately the new application form along with payment will be required in advance of all sewage inspections. Payments will be accepted by credit card or cheque. Applications must be signed. Permits will not be issued to homeowners when the work is being conducted by a contractor.

The process for sewage permit application, approval and inspections will be follows:

- Step 1:** Submit permit application and payment to:
- pubhealth@paphr.sk.ca
- Step 2:** Public Health Inspector reviews the application.
1. Accepted applications – Contractor will receive an email with a permit number
 2. Rejected applications – Contractor will have application returned for resubmission.
- Step 3:** Contractor contacts the district inspector for an inspection via pubhealth@paphr.sk.ca . To book an inspection, the permit number and location must be provided. Contractors must give at minimum 5 business days' notice to arrange an inspection time. **You may not schedule an inspection prior to permit approval and payment.**
- Step 4:** Once the sewage works is inspected and approved, the district inspector issues the completed permit to the applicant.

Permit Approval and Inspections

Contractors must submit the application and payment prior to conducting on site work.

Please note:

- Permit applications are required for all sewage works, including but not limited to new construction and any alterations to existing sewage works.
- **Prince Albert Credit Card payments will appear on your statement as:**

‘Victoria Hospital Cashier’

- Sewage permits expire when there is no request for inspections within 6 months from the date of issue or the date of initial inspection.
- When major deficiencies are encountered, a letter documenting the issues will be sent to the contractor. Contractors will not be able to book further inspections until the deficiencies are resolved.
- Major/significant deficiencies requiring a re-inspection may be subject to additional fees.

For your information *The Private Sewage Works Regulations* and guidance regarding onsite sewage systems is available online at <https://www.saskatchewan.ca/residents/environment-public-health-and-safety/environmental-health/sewage>
